Dear Hiring Manager,

I am writing to express my enthusiastic interest in securing an internship. As a graduate of computer science, I am keen to apply my skills in front-end web development and UI/UX, alongside my passion for research in human-computer interfacing.

The synergy between front-end web development and UI/UX has always intrigued me. My proficiency in HTML, CSS, JavaScript, Node JS, Handlebar, and responsive design enables me to create user-friendly interfaces. My coursework and personal projects have ingrained in me a deep understanding of UI/UX principles, which I channel into crafting user-centric designs.

My fascination with Human-Computer Interfacing has led me to the experience that has refined my research abilities, equipping me to gather user insights and translate them into effective design solutions. Recently, one of my research papers has been published in ACM COMPASS 2023. I am eager to contribute this expertise to real-world applications within your team.

A dedicated and quick learner, I am poised to embrace challenges and take on significant workloads. My adaptability ensures a smooth integration into your team's workflow. My intrinsic motivation continually propels me to enhance my skills and become an asset to your organization.

I am genuinely excited about the prospect of contributing to bKash and learning from your accomplished team. Thank you for considering my application.

I look forward to the opportunity to discuss my alignment with your company's goals.

Sincerely,
Fardin Huq
